

SELECTED UK WEBSITE & TELEPHONY BUILDS

The Telebyte Portfolio

Eight live builds across UK fitness, wellness, weddings, FCA-regulated claims, property finance, premium photography, and insurance — plus the custom-skinned ViciDial install.

2026 EDITION

ABOUT THIS PORTFOLIO

What Telebyte builds, and for whom.

Telebyte Solutions designs, builds, hosts, and runs the technology that UK contact centres and financial-services firms depend on. The portfolio below is the live work — eight production websites delivered between 2024 and 2026, plus a fully custom-skinned ViciDial install that proves the depth on the telephony side.

Every site listed is in production today. Every URL works. References from the clients available on request once a fit is established.

What this portfolio shows

Read across the eight projects and three patterns emerge. **One:** Telebyte builds for businesses where the technology has to disappear into the brand — a 40-year-old Tameside gym, a single-practitioner massage clinic, a family-run property developer. **Two:** Telebyte handles the regulated end of the spectrum properly — FCA-authorised claims firms with all the regulatory chrome that implies, and a live FCA-regulated insurance quote-to-application flow. **Three:** the same small team designs the brand, builds the front-end, integrates the payment or booking layer, hosts it, and runs it. No agency middle layer, no offshore handoff.

Inside this document

- 01 Olympic Sports Gym** — Memberships and recurring billing
- 02 Dee Thai Massage** — GoCardless Direct Debit + booking integration
- 03 Joyous Moments** — Tiered packages, enquiry-led close
- 04 Consumer Savings Network** — FCA-authorised claims, four verticals
- 05 SJG Property Holdings** — Bridging finance, intent-routed enquiry
- 06 Tina Hevingham Weddings** — Image-heavy premium photography
- 07 Tina Hevingham Photography** — Sister-site brand split
- 08 Friendly Shield** — FCA-regulated quote-to-application
- 09 Custom-skinned ViciDial** — Bespoke branding across admin and agent

WEBSITE PORTFOLIO

Olympic Sports Gym

Tameside's biggest free-weights gym, founded 1983 — and the family behind it.

[osg-two.vercel.app](#) · production: [olympicsportgym.co.uk](#)

A membership-led site for a 40-year-old family-run gym with a Manchester United Strength & Conditioning pedigree. Three concurrent payment models live on the join page — a one-month block at £40, a rolling monthly subscription at £29.99, and an annual block at £340 — alongside a member account area for plan management and a separate visitor-facing marketing surface.

What's notable

- Three payment models live in parallel: one-off block, rolling subscription, annual prepay
- Per-plan deep-link URLs (?plan=adult-rolling) for ad campaigns and concession routing
- Member account area at /account/login for self-service subscription management
- Review aggregation across Google, Birdeye, Facebook — 4.8 stars, 156+ reviews surfaced
- Equipment spec grid built for SEO — six squat racks, nine Olympic bars, etc.
- Single Companies House registered entity (OSG 1983 LTD) handles the trading

Stack

Next.js	Vercel	Stripe	Image CDN	MDX

WEBSITE PORTFOLIO

Dee Thai Massage

Single-practitioner deep-tissue clinic in Cheadle Heath, Stockport.

deesthaimassage.vercel.app · production: deesthaimassage.co.uk

A single-page anchor-architecture site for a deep-tissue specialist with twenty years' experience and a Wat Pho training pedigree. Integrates GoCardless Direct Debit for a £40/month members scheme alongside SimplyBook.it for one-off bookings — a payment-and-booking pairing that's genuinely uncommon outside of subscription-SaaS, and rare to see done cleanly in a single-practitioner site.

What's notable

- GoCardless Direct Debit integration for the members scheme
- SimplyBook.it embedded booking flow for walk-in appointments
- Member-vs-walk-in maths visualisation built into the members section
- Tiered pricing per treatment type AND per duration (1hr/1.5hr/2hr)
- Single-page anchor nav with smooth-scroll routing across six sections
- Direct Debit Guarantee compliance copy and dedicated /dd-guarantee page

Stack

Next.js	Vercel	GoCardless	SimplyBook.it	Anchor SPA
-------------------------	------------------------	----------------------------	-------------------------------	----------------------------

See </work/dee-thai-massage> for the members-scheme block and full set.

WEBSITE PORTFOLIO

Joyous Moments

The largest wedding venue styling showroom in Greater Manchester.

joyous-moments.vercel.app · production: joyousmoments.co.uk

Wedding venue styling and florals across Manchester and Cheshire. Built around a four-tier package architecture (Petal, Blossom, Bloom, Joyous) running from £450 to £2,950, with an à-la-carte hire system alongside for couples who only want a single item. Enquiry-led throughout — the close happens in the showroom, not in checkout, and the site is designed to drive showroom visits rather than online orders.

What's notable

- Four named package tiers with anchor-linked detail sections
- À-la-carte hire grid (chairs, dance floor, photobooth, audio guest book)
- Enquiry-led with category routing — appropriate for high-touch service
- Showroom visit booking with by-appointment messaging
- Multi-channel social proof: Instagram, Facebook, TikTok embedded
- Sister-network with Tina Hevingham Weddings — shared visual vocabulary

Stack

Next.js	Vercel	Image CDN	MDX content
-------------------------	------------------------	---------------------------	-----------------------------

See [/work/joyous-moments](#) for the package tier grid and showroom shots.

WEBSITE PORTFOLIO

Consumer Savings Network

FCA-authorised specialist claims firm, est. 2014.

[csn-website-mocha.vercel.app](#) · production: [consumersavingsnetwork.co.uk](#)

An FCA-authorised claims management firm (FRN 833181) with £30M+ won for clients since 2014. The build covers four specialist claim pathways — mis-sold car finance, investments, pensions, and FSAVCs — each with its own dedicated vertical landing page and qualification flow. The regulatory chrome is real: FRN displayed in the header, FCA disclosures throughout, fee cap language in the footer, and the “you don't need a claims management company” FOS notice that the regulator now requires.

What's notable

- Four vertical landing pages each with its own qualification flow URL
- FRN displayed in header alongside both 0800 and geographic phone numbers
- FCA-mandated regulatory disclosures and FOS signposting throughout
- Trustpilot and Google review aggregation with verified attribution
- Cancellation Form PDF download — FCA Consumer Duty cooling-off requirement
- Per-claim-type SEO targeting (Mis-Sold Car Finance, Pensions, FSAVC, SJP)

Stack

Next.js	Vercel	FCA-compliant forms	PDF download
-------------------------	------------------------	-------------------------------------	------------------------------

See [/work/consumer-savings-network](#) for the four-vertical grid.

WEBSITE PORTFOLIO

SJG Property Holdings

Family-run UK property developer and bridging-finance lender.

test.sjg-propertyholdings.co.uk

A single-page site for a family-run UK property developer that also offers bridging finance from £250k to £15m. The site is built around an intent-routed enquiry form — the dropdown distinguishes a development opportunity, a bridging loan request, an investment / joint venture, or a general enquiry, with each route handed off to the relevant person on the team. For a high-ticket B2B with 48-hour decision SLAs, the form fields *are* the qualification.

What's notable

- Intent-routed enquiry form with four categorised paths
- Premium interior gallery showcasing recent schemes
- Bridging finance section with clear ticket size and term structure
- Trust signals: 25 years trading, 380+ homes delivered, 48hr decisions
- Single-page architecture with anchor navigation
- Designed for £250k–£15m enquiries that need to feel hand-built

Stack

Next.js	Vercel	Single-page anchor SPA
---------	--------	------------------------

See </work/sjg-property-holdings> for the bridging finance section.

WEBSITE PORTFOLIO

Tina Hevingham — Weddings

Premium wedding photographer, Saddleworth and the North West.

tina-hevingham-weddings.vercel.app · production: tinahevingham.co.uk

An image-heavy premium photographer site with three package tiers (Half Day £1,500, Full Day £2,300, Premier £2,800) and a travel zone framework that distinguishes “within 1 hour of Manchester” from “up to 100 miles from Manchester”. Next.js Image Optimisation tuned for portfolio sites delivering hundreds of high-resolution images per page without sacrificing Largest Contentful Paint.

What's notable

- Three-tier package architecture with named pricing and travel zones
- Next.js Image Optimisation tuned for hundreds of high-res images per page
- Masonry portfolio grid with progressive loading
- Couple testimonials with attribution
- Sister-site cross-linking to the Newborn & Family arm
- Quiet brand voice — ‘a photographer in the room, not over it’

Stack

Next.js	Vercel	Image Optimisation	MDX galleries
-------------------------	------------------------	------------------------------------	-------------------------------

See </work/tina-hevingham-weddings> for the portfolio gallery.

WEBSITE PORTFOLIO

Tina Hevingham — Photography

Newborn, family, and maternity photography in Saddleworth.

tina-hevingham-photography-7b4v.vercel.app · production: tinahevinghamphotography.co.uk

The sister site to Tina Hevingham Weddings, sharing a design system but with separate information architecture, package structures, and SEO targets. A working example of how Telebyte handles brand splits without rebuilding the stack — shared design tokens, separate IA, separate marketing surfaces, single CMS.

What's notable

- Shared design system with the wedding photography brand
- Separate IA targeting newborn / family / maternity intent
- Distinct SEO surface — different keywords, different schema
- Cross-link from the wedding site footer creates a network effect
- Demonstrates Telebyte's approach to multi-brand single-stack delivery

Stack

Next.js	Vercel	Shared design tokens	Image Optimisation
---------	--------	----------------------	--------------------

See </work/tina-hevingham-photography> for the sister-site comparison.

WEBSITE PORTFOLIO

Friendly Shield

FCA-regulated accident & sickness cover from £10/mo.

shield.purefininsurance.co.uk

A live quote-to-application flow for an FCA-regulated UK accident and sickness insurance product, integrated server-side with a major UK friendly society's underwriting API. Built to the parent group's brand spec — PFS magenta and navy — with the form-flow architecture, GDPR cleanup, and FCA financial-promotions compliance baked in from the first commit. This is the working twin of the “Layer 01” build described on telebyte.co.uk.

What's notable

- Quote-to-application flow proxied server-side into insurer API
- FCA-aware from day one — financial promotions language, fair disclosure
- GDPR-clean: no client-side PII storage, encrypted-in-transit submission
- Brand-aligned to parent PFS group (magenta + navy)
- Trust footer with FCA, ICO, complaints handling references
- Production-ready, currently being scaled for ad spend

Stack

Next.js	Vercel	FCA-compliant flow	Insurer API integration
-------------------------	------------------------	------------------------------------	---

See [/work/friendly-shield](#) for the quote flow and trust footer.

TELEPHONY PORTFOLIO

Custom-skinned ViciDial

A fully branded ViciDial install — admin, agent, reports, the lot.

Most ViciDial consultants will install a stock open-source interface and consider the job done. Telebyte builds full custom skins — reskinning the admin console, the real-time dashboards, the reports surface, and the agent interface to look like a product, not an open-source install. It's the difference between handing a client “an Asterisk box with VICIdial on it” and handing them *their own* branded contact-centre platform.

What gets reskinned

- Login screens — admin (admin.php) and agent (agc/vicidial.php) — branded from frame one
- Admin home and primary navigation — Telebyte colour system, typography, logo placement
- Real-time dashboards — Telebyte-branded live agent state, campaign metrics, queue depth
- Reports surface — every standard ViciDial report exported in the client's brand
- Agent UI — disposition panel, scripting, hold-and-transfer, all in the client's brand
- Pre-built demo campaign (TBDEMO) with 8 demo agents (1001–1008) ready for client demos

Stack

ViciDial 2.14	Asterisk	Custom CSS skin	MariaDB	Apache
---------------	----------	-----------------	---------	--------

Live demo of the skinned install is available on request as part of any dialler engagement — see telebyte.co.uk/diallers for current pricing.

HOW TELEBYTE BUILDS

The same small team, every project.

Every site in this portfolio was designed, built, integrated, hosted, and is currently being maintained by the same small Telebyte team. No agency middle layer. No offshore handoff. No five-account-manager chain.

What that looks like in practice

- **Design — in-house.** Brand, typography, colour system, layout grid — all done by the same engineer who'll be writing the code.
- **Front-end — Next.js on Vercel.** Every site in this portfolio runs on the same stack. Image Optimisation, ISR, edge functions where they earn their keep.
- **Payments — whatever fits.** Stripe for one-off and subscription card payments. GoCardless for Direct Debit. SimplyBook.it for booking. No religious attachment to any one provider.
- **Integrations — case-by-case.** FCA-authorised insurer APIs, friendly-society underwriting endpoints, Mailchimp / ConvertKit lists, Google Reviews — wired in cleanly with server-side proxies where the data is sensitive.
- **Hosting and operations — ours.** Telebyte holds the Vercel project, the domain, the DNS, the SSL renewal, the analytics. Clients get an account; they don't get a dependency on a third-party agency to push a copy change.

Pricing

Visible on telebyte.co.uk/websites and updated as Telebyte's costs evolve. Quote-to-application sites from £12,500. Multi-product broker portals from £25,000. Marketing sites for premium SMEs (gym, photographer, wedding) typically £6,500–£12,000 plus hosting at £45–£150/month depending on traffic and integrations.

Like what you've read?

Book a 30-minute call with Telebyte. No slides, no sales pitch — just a straight answer on whether the same approach would fit your build.

telebyte.co.uk · hello@telebyte.co.uk

References from any of the clients listed in this portfolio available on request once a fit is established. Telebyte respects client confidentiality and asks the same of prospective clients in return.
